

RCR In-service Request Form

Company _____

Address of location for workshop _____

Contact Person _____

Contact phone _____

Estimated number of prosthetists in attendance _____

Choose two months in which you would like to have in-service, keep in mind, these are typically schedules two to three months in advance. Coyote will send you two to three dates to choose from

January February March April May June
July August September October November December

RCR In-service Requirements

- In-service start at **8:00 am**, unless otherwise requested by Coyote
- Host will supply breakfast, lunch, and refreshments for attendees , on site
- Demo patient will be supplied by the host
- Patient should have a new locking liner so we are not interfering with their current setup
- Patient should also have a prosthetic foot to use other than their current prosthetic
- Host needs to have a "classroom" setting with enough seating to comfortably fit the attendees
- A projector screen and or background should also be available for easier viewing
- We will need use of lab at same location as classroom. (this cannot be done at an offsite hotel)

We realize that schedules are busy and it is difficult to block out schedules completely, but we would like you to be mindful that we are pulling the instructor, Dale Perkins away from his full-time practice and would appreciate as much undivided attention as possible.
